

MUL-T-LOCK®

Interactive® CLIQ®

June 2009

Interactive® CLIQ® is an **Off-line Electro-mechanical Master Key System (MKS)** for commercial and residential applications

An ASSA ABLOY group technology

Electromechanical locking system added
to the high security mechanical cylinder

Wire free cylinders – easy to install
Battery in the key – easy to operate

One Key – Endless Possibilities!

More than 30 cylinder applications!

And more..

- CLIQ® cylinder
 - Normal
 - Extended memory
- CLIQ® key
 - User key
 - Quartz key
 - Quartz+ key

Problem

- Lost keys present a threat to the security of the Master Key System

Solution

- In the CLIQ system, a lost key can be easily unauthorized.

Problem

- Unauthorized duplication of key is a risk to the integrity of the locking system

Solution

- The CLIQ key is copy proof
- Communication between key and cylinder is encrypted (3DES)

Problem

- Organizations grow and change rapidly
- There is a need to adapt the locking system to the fast changes

Solution

- Authorization changes are easy
- Done with the user friendly SW and the Control Key

Problem

- Electronic systems are difficult to install
- Wiring is required

Solution

- Easy installation of CLIQ cylinder
- Cylinder does not require any wiring
- Battery is in the head of the key

D-Plus SW

Manager SW

CLIQ Manager Software

- The software for the daily management of a CLIQ system
 - Changing authorizations
 - Reading Audit Trail
 - Defining time profiles
 - Managing key holders
 - Handling lost keys
 - Using a Daylight Saving Time (DST)
 - Generating reports

CLIQ Manager Software Options

- Four versions of the Manager Software

Multi-system

- For managing more than one system
- For managing unlimited number of systems

Single system

- For managing one system in any size
- Intended for the locksmith or the end user

Manager 200

- For managing up to 200 (mechanical & electronic) keys in one system
- Intended for the locksmith or the end user

Manager 50

- For managing up to 50 keys (mechanical & electronic) in one system
- Intended for the locksmith or the end user

- Cylinder opens after introduction of up to 8 pre-defined sequence of keys
- For improved control and security
- Applications
 - Classified files
 - Computers and servers
 - Control rooms
 - Expensive equipment
 - Drugs

- Unique approach: to allow strategic partners the local assembly and programming of CLIQ systems
 - USA, UK, Canada, France, The Netherlands, Brazil, Spain and Austria
- Use of the D-Plus Software
- Stock of tested CLIQ sub assemblies
- Local production and service of CLIQ cylinders and keys
- Local design and programming of CLIQ systems

Quick response to customer's needs

- **CLIQ key which combined with access control systems**
 - RFID transponder is in the key head
 - **Compatible with electronic RFID control systems**

Syner CLIQ[®]

One Key, Endless Possibilities

IP Rating for CLIQ

Cylinder → IP55

Key → CE IP57

NEMA IP67

UT that were currently tested.

Description	Pass / Fail	Notes	Compatible	Job Number
Cylinder	Pass	IEC 60529 IP5x		07/1130
Key	Pass	IEC 60529 IPx4		07/1153
CLIQ Key	Pass	IEC 60529 IPx5		07/1151
Cylinder	Pass	IEC 60529 IPx5	NEMA IP6P	07/1151
Key	Pass	IEC 60529 IPx5		07/1151
Key	Pass	IEC 60529 IPx7		07/1152

Comments:

QualiTech - Environmental & Mechanical Lab. declare under our sole responsibility that the UUT CLIQ CYLINDER & KEY was tested to comply with the requirements of the applicable environmental test specification.

Typical applications for CLIQ

- Hospitals & Medical centers
 - Protect drug cabinets, patient data, etc.
- Schools & Universities
- Commercial chains
 - High rate of employee replacement
- Heritage buildings

More applications for CLIQ

- Offices
- Remote sites
 - Cellular telephone companies (Quartz+ keys)
- Banks
 - Sequence lock
- Casino, Lottery...
 - Using of padlocks
